

Developing Tomorrows Workforce, Today.

About Us

Basingstoke ITEC is a charity that is primarily funded through the Government Apprenticeship programmes and charitable contributions. We have been working with employers and learners successfully for over 40 years.

We think it is really important to support the community by providing a solid foundation of personal development for the corner stone of everyone's future careers. We want learners to recognise their innate characteristics and suitability for their future careers. We help employers develop tomorrow's workforce today.

Our vision is for Basingstoke ITEC to be recognised as the Digital and IT training provider who can be relied upon to provide an outstanding learning experience. Although we are based in Basingstoke, we work predominantly across the South East but have the ability to work across England.

AI Delivery and Organisational Transformation Programme Overview

AI Delivery and Organisational Transformation Level 5 Curriculum

This is an overview of the AI Delivery and Organisational Transformation Level 5 curriculum. We want to work with you to develop a bespoke learning plan to enable us to deliver the knowledge in a logical sequence.

We will complete an initial assessment, skill scan and math and English assessment to determine the needs of the apprentices. Our aim is for the apprenticeship unit to have a positive impact for you and for the apprentice so that they receive a great learning experience.

This plan is fully adaptable to support those with special educational needs or disabilities.

What is the AI Delivery and Organisational Transformation Standard?

The purpose of the AI Leadership – AI Delivery and Organisational Transformation apprenticeship unit is to help organisations lead sustainable, AI-enabled change. Learners will work with stakeholders to manage workforce impacts, implement AI risk management, ensure regulatory compliance, monitor system performance, and communicate risks and opportunities across the organisation.

Core skills include:

- Use evidence to inform governance of AI adoption, outcomes and facilitate improvement.
- Ensure sustainable and efficient AI and automation solutions.
- Apply principles relating to ethics and values-based leadership and governance, and regulatory compliance.

Who is this for?

This unit is suitable for professionals responsible for leading or overseeing AI implementation and organisational change within their organisation. Typical roles include:

- AI Implementation Lead
- Digital Transformation Manager
- Change Management Lead
- Operations Manager

Delivery

The delivery of this unit will include:

- Interactive workshops led by an experienced trainer.
- Practical activities and real-world AI case studies.
- Independent learning supported by online resources.
- Knowledge checks and reflective activities.
- Opportunities to apply learning within the workplace.
- Ongoing trainer guidance and feedback.

Duration & Assessment

The duration of the AI Adoption, Procurement and Governance Apprenticeship Unit is a minimum of 30 hours.

Assessment:

As a minimum, learners will need to pass a skills test delivered by the training provider, to demonstrate that they have acquired the skills and knowledge set out in the apprenticeship unit. Employers will need to validate the result to confirm the learner has been successful.

In addition, employers (or learners) have the option to choose independent external assessment where they feel it is appropriate, for example through use of a non-mandatory qualification.
